LAS CAPITAL

PRIVATE EQUITY FUND

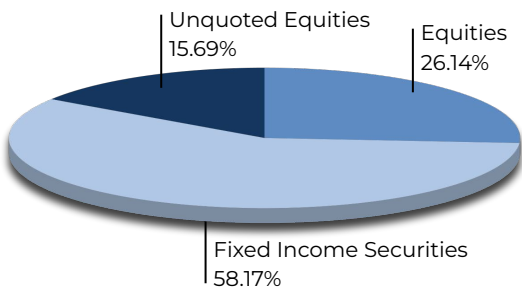

Fund Objectives and Strategy

The Fund will seek to achieve the investment objective of providing Unit Holders with capital appreciation by investing in equities and equity-related securities listed on Bursa Malaysia (or other recognized stock exchange) or any unlisted companies or funds which have clear proposition to add value based on the following investment approaches:

- (a) Value investing approach based on brand leaders with growth prospect in its respective sectors/industries; and
- (b) Growth investing approach which is based on prospective growth factors of the business that can generate year over year double digit growth on the net profit of the businesses.

Fund's Portfolio As at 31 December 2024

The Fund maintains a well-diversified portfolio across key industries. A significant portion is allocated to finance for stable returns, while property investments provide long-term value appreciation. The plantation sector represents growth in sustainable agriculture, and consumer products and services capture opportunities in evolving market trends. A portion of the portfolio is also held in cash to ensure liquidity and flexibility in capital deployment.

2024 Major Achievement

The year 2024 brought strong investment returns, with equities delivering the highest performance in our portfolio, generating a total return of 117%. This exceptional growth reflects our strategic selection of high-potential stocks.

In addition, we successfully secured fixed-income securities with an annual return potential of over 20%. While this investment did not reach a full-year tenure, it still contributed a total return of 7.63% in 2024, reinforcing our focus on high-yield opportunities.

Separately, our investment in the agriculture sector aligns with our commitment to sustainability, offering stable returns for the next 20 years. By entering at an early stage, we positioned ourselves to capitalize on long-term growth and successfully exited with capital gains.
